

LTE Cellular Is Ideal For

- Remote Facilities & Work Sites
- Security, Productivity & Controls
- Law Enforcement & First Responders
- Monitoring Construction Sites
- Scientific & Wildlife Studies

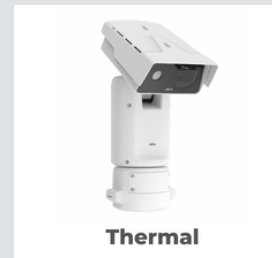

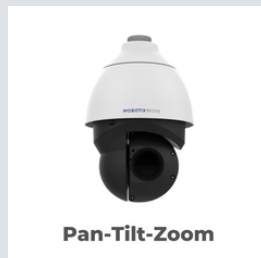

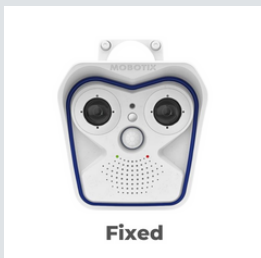

How It Works

If you have cell phone service at your project location, you will most likely be able to use LTE cellular communications to access your video system.

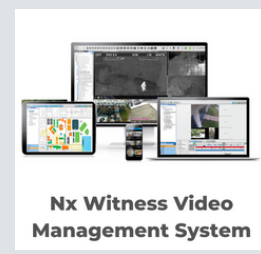

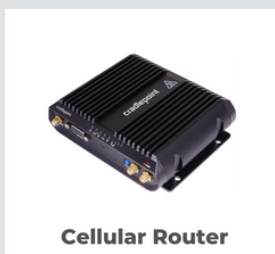

Our high gain antenna systems gather much more signal strength compared to the antenna in your cell phone.

Hundreds of Camera Models to Choose From

Other Major LTE System Components

Ships Plug & Play Ready, Includes Technical Support

No Power? No Problem!

We can supply you with a solar electric power plant.

Get more from your LTE camera system when you add the RadiusVision IoT Platform

- Prevent catastrophic loss
- Monitor equipment 24/7/365
- Immediate alerts when thresholds are breached
